Summary

Fresh Software Engineering graduate from Politeknik Negeri Bali (GPA 3.76/4.00) with a strong foundation in Frontend Development and UI/UX Design. Proficient in HTML, CSS/SASS, Bootstrap, and Tailwind CSS, with hands-on JavaScript and React.js experience, and skilled in Figma for wireframing, prototyping, and end-to-end UI/UX design across web and mobile. Built this foundation through academic projects, project-based learning (PBL), freelance work, and self-driven online courses — consistently delivering responsive, user-friendly, and visually polished digital solutions. Recognized for attention to detail, creativity, and fast adaptability, and eager to bring fresh ideas and dependable execution to a professional development team. Currently expanding into Webflow and modern Next.js patterns to deepen frontend expertise.

Work Experience

Freelance Web Developer

Denpasar, Bali

- Developed a garment-brand website (originally Youniform) using Next.js, Tailwind CSS, and Framer Motion, translating client feedback (via WhatsApp) into clear, structured implementation tasks.
- Continued ownership of the project through its rebrand to Room Production, live at room-production-app.vercel.app.
- Maintained design and code consistency across the rebrand, ensuring a smooth transition without disrupting existing functionality.

Fullstack Developer – PT. SUM Digital Konsultan

03 November - Present, Denpasar, Bali

- Contribute to Akasa SkyLens, a drone booking and cinematography platform, working across admin-facing features and verification on operator side.
- Gaining hands-on professional experience with Ruby on Rails and Hotwire (Turbo Streams + Stimulus) on the job — building on a frontend foundation to take on full-stack tasks.
- Helped implement a multi-step checkout flow with email-based OTP verification and a customer identity/session system
- Built UI features including a Stimulus-based toast notification system, dark/light theme switching with Tailwind CSS, and an operator-facing QR code verification flow.

Frontend Web Developer Internship – PT. Appkey

1 August 2024, Denpasar, Bali

- Participated in developing a real website project with the team.
- Fixed several bugs and added features according to the client's wishes.
- Held meetings with the team to achieve common goals.
- Optimize CSS and image assets, reducing loading time on the main page.
- Collaborate with the QA team to add test data and optimize map display with Leaflet JS.

Final Project Website Developer Kampus Merdeka – PT. Amanah Karya Indonesia

4 June 2024, Depok, Jawa Barat

- Developed a sports field reservation project in a group of 5 members
- Worked as a Front End Developer, focusing on slicing, creating interactive websites, and creating responsive websites.
- Created this project using Laravel and Bootstrap 5.

Mini Project Website Developer Kampus Merdeka – PT. Amanah Karya Indonesia

27 May 2024, Depok, Jawa Barat

- Created a social media application according to the direction of the mentor
- Developed an individualized social media clone project with Laravel and Bootstrap 5
- Managed features on profile settings, functional posting, and users
- Added features like, comment, follow, unfollow, search users, and post bookmarks

Website Developer Mentee Kampus Merdeka Independent Study – PT. Amanah Karya Indonesia

16 February 2024

- Learned the basic fundamentals of website development such as HTML, CSS/Bootstrap, Javascript/ JQuery, PHP/Laravel, MySQL, Database/ERD.
- Collaborated as a team to complete the final project from all the materials given from the beginning.
- Learned about soft skills for the world of work such as how to communicate, team collaboration, and how to solve problems together.

Tourism Information System Rent Car Website – Politeknik Negeri Bali

25 November 2023, Jimbaran, Bali

- Collaborated as a team in creating a website
- Collaborated in creating a design analysis system with the team
- Implemented the results of the design analysis system by creating prototype and HIFI images in Figma
- Implemented the results of UI designs that have been created using HTML, CSS, Tailwind CSS, Laravel
